

*Precise Molds for Lasting Impressions!!*

# THE EXCEPTIONAL MOLDS SYSTEMS OF ELASTOQUIP

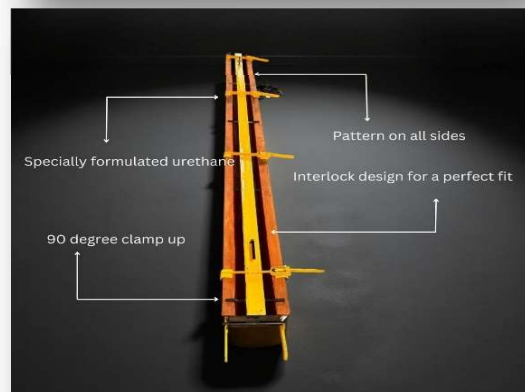

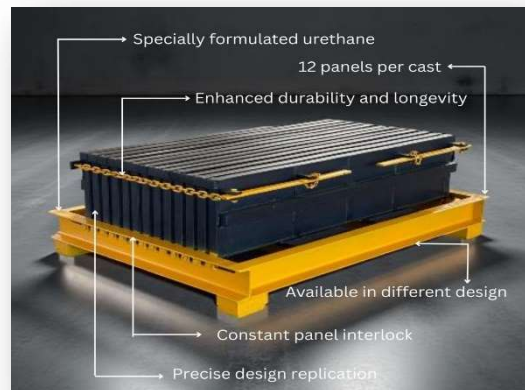

Introducing **THE FENCE MOLD SYSTEM**, meticulously engineered to ensure that our fence components offer outstanding dimensional accuracy, consistency and structural integrity for years. Our exclusive urethane materials are carefully stored in a controlled environment, maintaining their quality and resistance to natural elements. Our molds are designed without removable liners, removing the need for replacements or gluing. Experience the reliability and efficiency of The Mold for all your fencing needs.

**EACH SET INCLUDES:** a panel mold capable of producing twelve panels daily, dimensions of one foot high by five feet long. Additionally, you'll receive two line post molds ranging from two to ten feet, as well as two panel cap molds and a Post cap mold producing five caps per casting cycle.

**WITH JUST FIVE SETS**, you can create approximately fifty feet of six-foot high fencing each day. Corner, End, and "T" posts are available for purchase, with an optional external electric vibrator for seamless operation molds.

Each set of molds requires 1 cubic yard (0.76 cubic meters) of concrete per pour. We typically use a 6-bag pea and gravel concrete mix, but this can be adjusted based on material availability.

Orders are prepared within 4-6 weeks, excluding shipping, although this time frame may change before the order is finalized. Please note that all aspects are subject to change at the time of order.

## THE EXCEPTIONAL NATURE OF ELASTOQUIP MOLDS

Before the early 1980s, fences were primarily constructed from wood, brick, and stone. These traditional materials, while durable, were often expensive and prone to wear over time. However, the introduction of concrete fencing brought a new era of options, providing enhanced aesthetics, functionality, and cost-effectiveness for property owners. This innovative material revolutionized the fencing industry, making it easier to achieve both style and durability!

Now offered by Elastoquip, the original designers & creators of double-sided fencing introduced in 1981, our molds are recognized globally. Architects, engineers, and both commercial and residential developers choose our precision engineered molds for their superior quality and design. The reasons are clear: our innovative solutions deliver unmatched durability, aesthetic appeal, and versatility for any project

**AESTHETICS** Created from our precision-engineered molds, Elastoquip screening and perimeter fences offer the stunning appearance of stacked stone, crafted wood, and old brick, fostering a warm and inviting ambiance. With rich custom colors and textures on both sides, they seamlessly complement landscapes and existing structures., our fences can be creatively combined with elements like wrought iron and masonry columns, enhancing the overall aesthetic of your property

**DURABILITY** Maintenance-free Elastoquip concrete, cast from our molds, is perfect for various soil conditions. It is termite-free and resistant to warping fading, or rotting. Our precision manufacturing ensures high quality and uniformity, delivering a flawless concrete impression on both sides of the fence!

**VERSATILITY** Elastoquip products serve as exceptional sound and security barriers, requiring no continuous foundation while withstanding typical ground movement. They can be installed up to 8 feet high, providing robust protection and privacy. In the event of damage, individual fence components can be easily replaced without compromising the overall structure.

**SERVICE** Elastoquip offers top-notch molding equipment for creating wall and fence systems of the highest quality. Our team consists of professionals with extensive backgrounds in engineering and construction, bringing first-hand experience in the concrete and engineering industries. This solid foundation enables us to produce precision-engineered molds that meet our customers' specific needs
